génia

the veterinarian's preference

■ GÉNIA, A VISION FOR THE FUTURE

Génia is France's leading manufacturer of medical devices for pet health care professionals (pet doctors, breeders, pharmaceutical companies, etc.). After more than 70 years of development, Génia has become an industry leader in the production of high-end veterinary organic resin syringes.

Although we have been known for animal products in the early stages of our development, for the past 15 years we have been committed to achieving the same level of quality in our canine products through improvements and innovations.

Pet health care experts, the wealth of professional knowledge of pet doctors has always been the source of innovation and improvement of our products. To date, we have sold more than 2,500 products, 9 ranges: injection, surgery, orthopedics, hospitalization, capture, protection, hygiene, livestock and grooming. At the same time, we have also been exporting for more than 25 years, serving more than 70 countries and regions around the world, and has subsidiaries in Australia, North America and China.

■ ZHIMIYA, YOUR PARTNER IN ASIA

Established in 2014 as a wholly foreign-owned enterprise located in Zhongshan, Guangdong.

Zhimiya is a wholly owned subsidiary of Génia and its exclusive distributor in Asia.

Our mission is to provide you with Génia's extensive expertise in pet medicine.

At the same time, we provide you with a series of innovative veterinary medical devices and consumables.

Simplify your life and improve your medical experience.

■ PERFUVET® DUO

Extra-long infusion set with two injection ports for small animals.

- Ideal for surgery if the injection port is inaccessible or if the patient is aggressive.
- Precise flow control roller clamp.

Code x 12	Model
157395	Perfuvet® Duo

Outer packaging:
12 boxes/boxes.

■ PERFUVET® PLUG

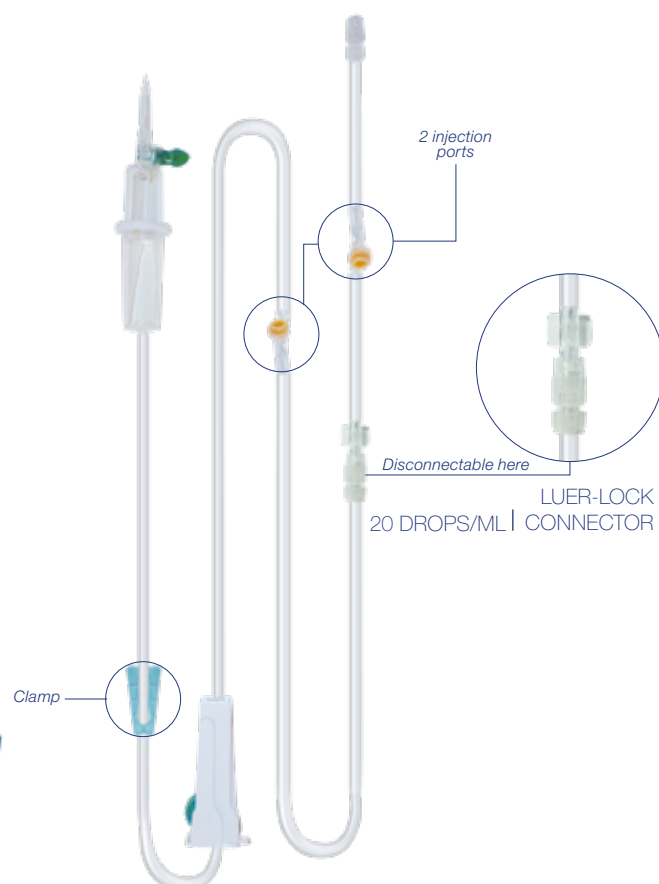

Extra-long infusion set with two injection ports and Luer-Lock hub for small animals.

- Ideal for surgery if the injection port is inaccessible or if the patient is aggressive.
- Luer-Lock hub at 5 cm from the first injection port making it possible to easily disconnect the infusion to move the animal.
- Precise flow control roller clamp.
- Calibration: 20 drops/mL.
- Extra-long 200 cm PVC tube.
- Two injection ports at 20 cm and 110 cm from the Luer-Lock connector.
- Convenient clear and flexible drip chamber to control the flow and to allow for easy priming.
- Sharp spike to ensure easy piercing of any bottle.
- Closable venting.
- Luer-Lock distal cap.
- Slide clamp fitted.
- Delivered assembled for easy use, with 2 caps packed separately in a sterile bag.

Supplied in boxes of 12.

Code x 12	Model
157397	Perfuvet® Plug

Outer packaging:
12 boxes/boxes.

PERFUVET® MICRO

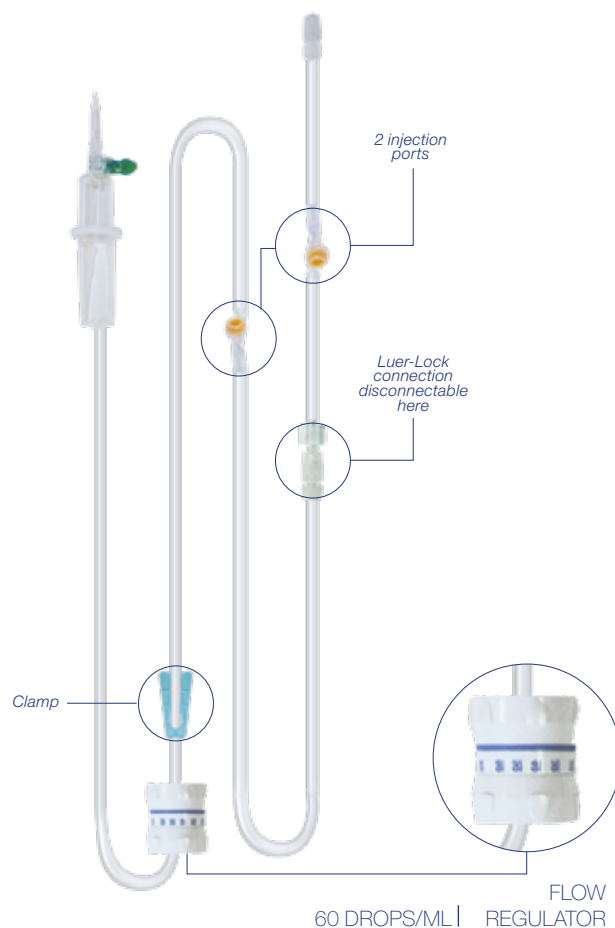

High precision Micro IV infusion set with two injection ports for very small animals (puppies, kittens, exotics).

- Extra-long 200 cm PVC tube.
- Two injection ports at 20 cm and 110 cm from the Luer-Lock connector.

Supplied in boxes of 12.

Code x 12	Model
157398	Perfuvet® Micro

Outer packaging:

SURGITEK **Surgical gloves**

Anatomically-designed sterile latex surgical gloves, lightly powdered, with long cuffs.

- Natural latex with low protein content to limit allergenicity.
- Good stretchability > 850%.
- Length 290 mm for better protection of the lower surface of the forearm.
- Variable thicknesses to ensure strength and flexibility (0.23 mm thick at the palm, 0.21 mm thick at the wrist, 0.26 mm thick at the fingers).
- Micro-textured palm for improved grip on instruments.
- Lightly powdered with biodegradable USP grade cornstarch (non-allergenic): < 100 mg/g.
- Anatomically-designed fingers and thumb.
- Rolled edges for easier removal.
- Double wrapped in medical grade packages.
- Sterilised by gamma radiation.

Supplied by 50 pairs per dispenser box.

EASY FASTENING SYSTEM

PLEASE ASK TO YOUR VETERINARIAN HOW TO USE THE COLLAR CORRECTLY

1. Position the Velfast «how to use» label on the animal skin side.

2. Adjust the size to the neck girth of the animal.
*Do not overtighten !
You must be able to easily place your finger between the neck and the collar.*

3. Overlap and stick the and loop layers using all the available surface without exceeding it. The label must be under the animal's head.

VELFAST®

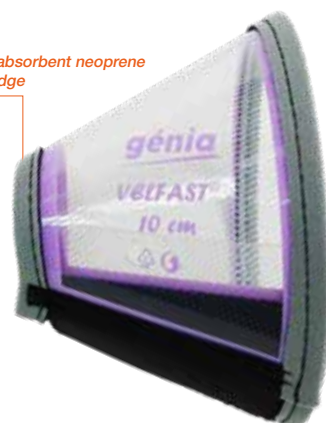

NEW

Transparent colourless polypropylene E-collars with double outer edge of shock-absorbent neoprene.

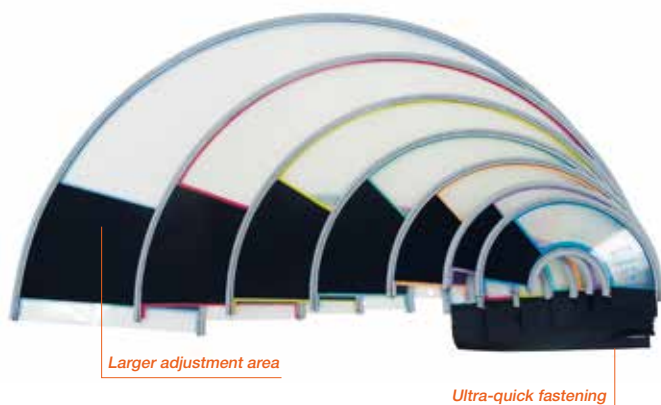

- Ultra-quick fastening system with self-adhesive strips. Detachment-resistant, with a larger adjustment area than ordinary fastening systems.
- Reinforced with lining.
- More comfortable for pets and easier to adapt to wearing (shock- and sound-absorbent lining, no stress on the neck).
- Colour-coded according to size.

Supplied by 12 in cardboard boxes.

Quick fastening system secured with double interweaving tabs.

- 3 to 5 neck size options.
- Protects the head, abdomen and legs.
- Separate fasteners on the collar.
- Storage hole for hanging and selecting a collar simply by pulling it down.
- E-collar inks comply with FDA standards, non-toxic for animals.

ASSEMBLY

Push the side (widest) tabs into the selected slits, with the smooth side facing inward, and then pull them through the adjacent slits.

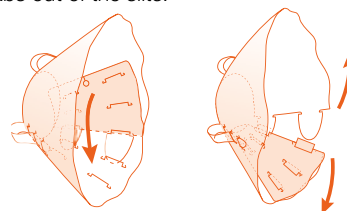

Repeat with the small tabs.

DISASSEMBLY

To take the collar off easily, firmly fold the part that is overhanging after assembly.

Pull the tabs out of the slits.

COSYPAD® Mesh pad

NEW

A new generation mesh pad made from anti-bedsores material used in hospitals, Cosypad® offers comfort, hygiene and ease of cleaning. It is preferable to grates, underpads, and others bedding. Its aerated structure keeps animals clean and dry. Cosypad® provides comfort to animals and saves professionals time.

- Reduces the pressure exerted on muscles and joints for optimal comfort and the prevention of bedsores.
- Hygienic: liquids drain under the pad, leaving the animal dry.
- Does not retain fur.
- Good aeration, allowing better healing of wounds and better thermoregulation.
- Hypoallergenic material, odourless, antibacterial.
- Very strong, mould-resistant and insulating.
- Reinforced seams and tough nylon on the edges for better durability.
- Rounded edges to avoid chewing.
- Anti-slip surface.
- Washable:
 - in a washing machine at 40 °C with a bleach pellet,
 - with a hose after soaking in a disinfecting solution,
 - use of dryer and spin cycle not recommended.
- Suspension eylet for hanger (code 306117) for easy storage.
- Uses:
 - in hospital cages,
 - on examination tables,
 - in veterinary surgery,
 - during the post-operative recovery stage,
 - in dental scaling (fast drainage of liquids),
 - as anti-fatigue mat (for the surgeon).

Easier to store

TESTIMONIES

Numerous veterinary practices already use the concept and show innovative qualities of the pad.

Alfort Veterinary School (France)

- Excellent thermal insulation to use instead of duck-boards and underpads in cats kennels.
- A better grip for animals, thus more safety especially after orthopedic surgeries.
- More hygiene because animals are not soiled by urines anymore.
- Provide an optimal comfort in dogs kennels.
- Prevent the formation of bedsores on animals during long hospitalization.
- Easy washing at 40°C with a disinfectant

Armand Valla – Rauzan (France)

We chose to use COSYPAD® in surgery room because their characteristics are optimal for the following needs : isolation of animals on the table of surgery, management of the hypothermia, perfect fluids flow under the animal which remains dry and not soiled, comfort and stability of the animals placed in dorsal decubitus. Pads are daily washed in machine with bleach tablets, dry extremely fast and present no sign of wear.

Dr. Jean-paul Zendali – Fribourg (Switzerland)

I use COSYPAD® in the recovery rooms, after surgeries. Cats or dogs always urinate in phase of awakening – because of pre-surgery perfusion - and it is always unpleasant to return an animal still wet to its owner. With COSYPAD®, this problem is solved ! The cleaning is easy : under the shower or in washing machine. It is comfortable and soft for animals in the awakening, which never damaged it so far! Really an advantage for the daily use.

VACUUMAT® Vacuum fixed air cushion

Vacuum immobilization mattress.

- Made of sturdy polyurethane material.
- Radiolucent.
- Easy to clean.
- 15% more microbeads to perfectly conform to the animal's shape.
- Flexible, comfortable and very sturdy material.
- The vacuum system allows complete immobilization in the desired position, which is ideal for radiology, ultrasound, MRI, CT and surgery.
- Thermal insulation.
- High quality safety valve, which can maintain vacuum over more than 72 hours.

Supplied by unit with a pump.

TESTIMONIES

Dr. Demian, ULYSSES Pet Clinic, CAIRNS

We recently purchased two of the VACUUMAT® for our busy small animal practice. They have been an instant hit with all the nurses and the vets. They are fantastic for holding patients in position (especially the awkward deep chested breeds) and are extremely easy to use and keep clean. I would highly recommend them. In fact I've just ordered some more!

WEST PENNANT HILLS Veterinary Hospital

We used the VACUUMAT® to help with positioning for surgery especially in deep chested dogs or where the lump is at an awkward angle. I have also used it for taking x-rays on one dog where the foam wedges kept sliding and we couldn't get the position we wanted until we tried the mat. Seems to clean up fine and quite robust. Very happy with it so far.

DRYSOFT® Absorbent pad

Super absorbent, silky and comfortable pad made of super absorbent polymer (SAP*) gel layer covered with a thin cellulose layer and resting on waterproof and non-skid non-woven layer.

- 5 layers to optimise the absorption of liquids.
- Polymer gel (SAP*) to neutralise odors.
- Antimicrobial protection.
- Fast soaking.
- Does not leak after absorption of the volumes listed.
- Moderately wet after absorption of the required quantities.

*SAP (Sodium polyacrylate): Super Absorbent Polymer, absorbs 200 to 300 times its mass in water.

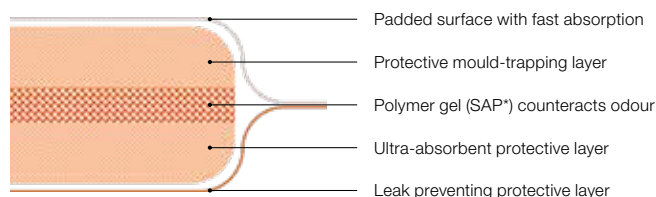

Supplied by 25 or 30.

Code	Size	Absorption capacity	Pack.

HOW TO USE A ROLL SPLINT ?

SPLINTS

Concave plastic splints; red, blue or green depending on size; coated with a thick protective foam.

- Very strong material, poly-gloss finish.
- No sharp angles, thick closed-cell protective foam that extends beyond the edges of the splint to protect the animal.
- Can be cut to fit the animal's limb.
- Air holes along the length of the splint allow air to circulate and prevent scar formation.

Supplied by unit or by 12.

NO SHARP ANGLE | VERY STURDY MATERIAL |
